Fortress
World Funds Limited SCC

Investment Objectives & Fund Details

The overall objective of the Fund is long-term capital appreciation. The Fund is divided into two sub-funds: **Fortress World Growth Fund** and **Fortress World Fixed Income Fund (The Funds)**. Each sub-fund pursues a discrete investment policy and strategy consistent with its objectives. The **Fortress World Growth Fund** has the objective of long-term growth from diversified investment in global equities. The **Fortress World Fixed Income Fund** has the objective of steady returns over the medium-term from diversified investment in high-quality bonds.

The Funds do not pay dividends. Investors receive their entire return, including interest, dividends, and capital gains, via the Funds' increase in Net Asset Value.

All dollar amounts are in U.S. dollars unless noted otherwise.

Fortress World Funds Limited SCC is a segregated cell company incorporated in Barbados with limited liability to carry on mutual fund business. It is an umbrella fund offering sub-funds ("cells"), each of which has its own assets and liabilities, and pursues its own, independent mandate and investment objective.

Important information about the Fund is contained in its offering memorandum, and in the supplements for each specific cell, all of which are available at www.fortressfund.com or may be requested from the Manager. You are encouraged to read the relevant documents before making an investment. The indicated returns in this document are net of all fees and expenses. Returns are historical and not necessarily indicative of future performance. Investors should be aware that there are risks involved where the value of the Fund's shares may go down as well as up.

This does not constitute an offer or solicitation to anyone in any jurisdiction in which such offer or solicitation is not authorised or to any person to whom it is unlawful to make such offer or solicitation. **The Fund may not be sold to U.S. persons.**

Investment Performance

Net Asset Value and Return Summary to September 30, 2025:

Fortress World Fixed Income Fund	\$0.9756	\$0.9634	1.3%	-0.5%	Jan. 29, 2021

**Periods longer than one year are annual compound returns.*

Quarterly reports for the Funds, including current positioning and long term performance since inception, are available at www.fortressfund.com.

Directors' Report

Directors' Report

"The Fortress World Growth Fund and Fortress World Fixed Income Fund gained 5.7% and 1.3% respectively for the year ended September 30, 2025"

The **Fortress World Growth Fund** and **Fortress World Fixed Income Fund** gained 5.7% and 1.3% respectively for the year ended September 30, 2025, as global equities rose in a volatile year, and bond yields were about stable. Emerging and international equities led the way with outsized gains. U.S. stocks also advanced but value shares (where we invest) lagged, as returns and investor enthusiasm were largely concentrated among the largest technology companies. The World Growth Fund's primary allocations to U.S., international and emerging markets equities returned between -2.9% and 32.0% for the year, with the greatest returns coming from the emerging markets shares that started the year among the cheapest in the world.

For bonds, the past year brought a more stable dynamic after fighting a headwind from rapid interest rate increases in recent years. Inflation continued to moderate across most major economies, and central banks lowered interest rates. While the adjustment has been uneven, it has provided some support to bond prices globally, especially in shorter maturities which are more influenced by monetary policy. Yields were about stable overall, credit spreads tightened, and investors grew more confident that inflation could be brought under control without a deep global slowdown. For the World Fixed Income Fund, this environment translated into steady income and still good prospects for future returns.

Each of the Fortress World Funds pursues its own, independent mandate and investment objective. In each, we select investments systematically based on clear, disciplined value criteria and focus on achieving long-term returns while limiting risk. A summary of each Fund's performance and positioning is provided below.

For a detailed listing of each Fund's holdings, please see the accompanying financial statements, or view the periodically updated holdings information in Bloomberg. (Where allocations are made to other Fortress funds, management fees are rebated to the Fund to avoid double charging.) Additional investment commentary is also contained in quarterly reports for these and other Fortress funds available at www.fortressfund.com.

INVESTMENT PERFORMANCE AND POSITIONING

Short summaries by Fund are below.

Fortress World Growth Fund

The Fortress World Growth Fund returned 5.7% for the year ended September 30, 2025, reaching a new high as the Fund's global investments mostly generated strong returns. Overall, the main global index rose 7.6% for the year. The Fund's core allocations to the Fortress US Equity, International Equity and Emerging Markets funds returned -3%, 10% and 32% respectively. The return in the Emerging Markets fund outpaced the market average

while the return for the International Equity fund was in line with market performance. The return in US Equity was well below market averages, as index returns continued to be driven by outsized gains in a subset of large, highly valued technology stocks. This is an area in which the Fund has only minimal exposure due to its high valuation and corresponding risk.

In equities, the first half of the year was marked by sharp moves in global markets due to changing trade policies and political uncertainty. Markets steadied after the U.S. paused tariff increases to negotiate trade deals, investors began to anticipate easier monetary policy, and excitement spread about the impact of artificial intelligence on technology companies. By mid-year, the focus had shifted from, "When will interest rates fall?" to "How much will rates fall, and how fast?" When the Fed delivered its first rate cut in September, it confirmed that the unwinding of its inflation-fighting tightening cycle was resuming. Equity and bond markets both rallied.

Emerging markets were standouts this year, supported by great starting valuations and signs of renewed government support in China. International shares also performed well, with Japan continuing to benefit from corporate reforms and more shareholder-friendly policies. Contrary to many investors' expectations following the new administration in the U.S., most global currencies strengthened meaningfully against the dollar. This added to gains in U.S. dollar terms from investments all around the world. The Fund's allocations through the Fortress Global Funds captured these gains effectively.

The Fund's portfolio consists of allocations to the Fortress US Equity Fund (44% of the portfolio), Fortress International Equity (40%) and Fortress Emerging Markets Fund (14%). These portfolios are as always focused in areas of high-quality and reasonable valuations where we see substantial potential for future returns. Even with this year's positive

result, we still see substantial return potential from this subset of global equities, in both absolute and relative terms. This is now even more true for value investments in the U.S., where valuations have come down relative to market averages and investments in other parts of the world.

US EQUITY

	PE Ratio	PB Ratio	Div Yield	ROE
Fund	16.0	3.9	2.3%	24.4%
Index	22.7	5.5	1.4%	24.2%

INTERNATIONAL EQUITY

	PE Ratio	PB Ratio	Div Yield	ROE
Fund	12.7	2.0	2.8%	15.7%
Index	14.7	2.1	2.7%	14.3%

EMERGING MARKETS

	PE Ratio	PB Ratio	Div Yield	ROE
Fund	10.4	1.6	2.5%	15.4%
Index	13.4	2.0	2.2%	14.9%

On a look-through basis the Fund's globally diversified portfolio has an average price/earnings (P/E) ratio of 13.5x and a dividend yield of 2.7%, levels still consistent with substantial future returns.

Fortress World Fixed Income Fund

The Fortress World Fixed Income Fund returned 1.3% for the year ended September 30, 2025, mostly due to steady coupon income as bond prices were little changed. The main index of U.S. high-quality bonds, which includes both corporates and governments, rose 2.9%.

The Fund's return this year was driven by steady coupon income and generally stable prices in global bonds. Short-term yields declined slightly across most developed markets as inflation eased and growth moderated while longer term global yields rose on concerns that new trade and tariff policies would prove inflationary. In the U.S., the Federal Reserve (Fed) made its long-awaited interest rate cut in September after nearly a year of holding rates steady. Earlier in the year, strong economic data and unknown tariff impacts had delayed the start of easing, and longer-term yields stayed elevated for much of the period. As inflation trends continued downward, confidence grew that the easing cycle could resume. The 10-year U.S. treasury yield rose slightly from about 3.8% to 4.2% over the year, while shorter maturities declined slightly, steepening the yield curve. Corporate credit spreads, already tight at the start of the year, narrowed further as investors took comfort in resilient earnings and moderate growth. Emerging market bonds were mixed, with solid returns especially in some Latin American and commodity-linked markets.

During the year, we gradually extended the portfolio's duration as longer term yields rose, adding selectively to U.S. treasury holdings. The market is pricing in an increased chance of inflation rising in the long-term at the precise moment that economic activity is moderating after the runoff of fiscal stimulus and the headwind of tariffs. This improves the risk/reward prospects for longer dated investments, in our view. The Fund continues to hold a blend of fixed and floating-rate securities to balance the potential for further rate declines with the possibility that rates could stay higher for longer than investors currently expect. Corporate bond holdings meanwhile remain

concentrated in the highest quality issuers and shorter maturities, where exposure to spread widening from economic weakness, if it develops, would be minimised. With corporate spreads still at historically tight levels, we do not see a strong argument to take on thinly compensated lower credit risk at this time.

As of September 30, 2025, the average term to maturity of the Fund's diversified holdings was 7.5 years. The average gross yield to maturity of the portfolio is 4.4%, a good estimate of its medium-term return potential. The portfolio of high-quality government and corporate bonds is structured to generate an acceptable yield while remaining robust to a range of risks including those from rates, inflation, and credit.

More investment commentary by Fund may be found in the quarterly reports for each Fund.

OUTLOOK

Even after a volatile year, we see an investment world that still has plenty of opportunities for disciplined investors. Companies and markets have adapted at least partially to recent policy surprises and sudden shifts in the operating environment. The post-pandemic inflation surge appears to have passed, allowing interest rates to decline. Economic activity on average remains relatively healthy. Artificial intelligence is likely to make people wealthier and more productive than they might have been otherwise. But the news is not all good. Trade policy changes have damaged some parts of the global economy, especially in the U.S. At the same time, many U.S. stocks, particularly in the technology sector, are priced with very high expectations already baked in, meaning that future disappointment is possible. Thankfully, for the **Fortress World Growth Fund**, there are very good values in other sectors and regions where sentiment has remained subdued, or even weakened, and operating results have been just fine. After

the year we've just had, a surprising number of these opportunities can be found in the quieter areas of the very U.S. market that also contains some of the highest priced shares.

For fixed income investors, the backdrop of lower interest rates presents a more balanced risk/reward profile than we have seen in some years. Bond yields today are high enough to offer reasonable returns even without future price gains and declines in yields from here would add to total returns. Corporate spreads are tight, so we must be selective in corporate investments as global growth is slowing but has so far avoided recession.

The **World Fixed Income Fund's** positioning in high-quality government and corporate bonds, combined with its moderate duration, should continue to deliver attractive risk-adjusted returns and is well positioned for the next phase of the cycle. With inflation moderating, interest rates still at appealing levels and likely to trend lower, and credit conditions stable, our outlook for fixed income remains constructive. The Fund's diversified portfolio and disciplined approach are designed to deliver consistent income and preserve capital across a range of future scenarios.

We are extremely grateful for the contributions of the many skilled people and excellent organisations that make running a fund like this possible. We would especially like to thank the Board members of the Fund and the Manager for their commitment and diligence over many years. We also thank SigniaGlobe Financial, the Fund's custodian; EY, the external auditor; and Ravichandran Whitehead, the internal auditor, for their professionalism and continued support.

Finally, thank you to you, our shareholders, for your trust and partnership. We look forward to reporting continued progress for the Fund in the years ahead.

INDEPENDENT AUDITOR'S REPORT

TO THE SHAREHOLDERS OF FORTRESS WORLD FUNDS LIMITED SCC

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Fortress World Funds Limited SCC (“the Fund”), which comprise the statement of financial position as at 30 September 2025, and the statement of changes in equity, statement of comprehensive income and statement of cash flows for the period then ended, and notes to the financial statements, including a summary of material accounting policy information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at 30 September 2025 and its financial performance and its cash flows for the period then ended in accordance with IFRS Accounting Standards.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (“ISAs”). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the International Ethics Standards Board for Accountants’ (IESBA) International Code of Ethics for Professional Accountants (including International Independence Standards) (“IESBA Code”), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information included in the 2025 Annual Report

Management is responsible for the other information. Other information consists of the information included in the Annual Report, other than the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

**Shape the future
with confidence**

INDEPENDENT AUDITOR'S REPORT

TO THE SHAREHOLDERS OF FORTRESS WORLD FUNDS LIMITED SCC

Report on the Audit of the Financial Statements (Continued)

Responsibilities of Management and the Audit Committee for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

The Audit Committee is responsible for overseeing the Fund's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

**Shape the future
with confidence**

INDEPENDENT AUDITOR'S REPORT

TO THE SHAREHOLDERS OF FORTRESS WORLD FUNDS LIMITED SCC

Report on the Audit of the Financial Statements (Continued)

Auditor's Responsibilities for the Audit of the Financial Statements (Continued)

- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other Matter

This report is made solely to the Fund's shareholders, as a body, in accordance with Section 147 of the Companies Act of Barbados. Our audit work has been undertaken so that we might state to the Fund's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law and subject to any enactment or rule of law to the contrary, we do not accept or assume responsibility to anyone other than the Fund and the Fund's shareholders as a body, for our audit work, for this report, or for the opinion we have formed.

Fortress World Funds Limited SCC

Notes to the Financial Statements

September 30, 2025

(expressed in United States dollars)

1 Incorporation and principal activity

Fortress World Funds Limited SCC (“the Company”) was incorporated in Barbados on March 24, 2020, is registered as a segregated cell company under the Companies Act of Barbados. The Company was licensed under the Mutual Funds Act 2002-22 as an authorised Mutual Fund on January 1, 2021. The Company maintains its registered office at Radley Court, Upper Collymore Rock, St. Michael, Barbados.

The Company is divided into two cells, Fortress World Growth Fund and Fortress World Fixed Income Fund (each “a Fund” and together “the Funds”). Each segregated cell has a separate and distinct portfolio of investments and a separate class of shares are issued in respect of any such segregated cell. Separate books and records have been maintained for each segregated cell. Each cell is an open-ended fund. The Company is a separate legal entity, while each segregated cell is not a separate legal entity. The assets and liabilities of the Company held within each segregated cell are segregated from the assets and liabilities of other segregated cells and from the general assets and liabilities of the Company. The assets of each segregated cell are only available to meet the liabilities attributable to that particular segregated cell.

The investment objective of the Fortress World Growth Fund is long term capital appreciation. The Fund is intended as a vehicle for long-term investment. The Fund seeks to achieve its objective through diversified, value-based investment in publicly listed global equities. The Fund's investment exposure may be accomplished via individual securities, the Fortress Global Funds SPC, or via external managers through diversified, value-based investment in publicly listed global equities.

The investment objective of the Fortress World Fixed Income Fund is to generate consistent returns and minimise fluctuations in the value of principal over a medium-term. The Fund seeks to achieve its objective by investing primarily in high-quality government and corporate fixed income securities across a range of maturities, reducing risk and volatility through consistent portfolio structure and diversification. It aims to increase returns by investing selectively in corporate bonds whose yields are more attractive than would be suggested by the issuers' underlying operations, risks and business prospects.

The Funds' investment management and administration activities are performed by Fortress Fund Managers Limited.

2 Accounting policies

The material accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all years presented, unless otherwise stated.

a) Basis of preparation

The financial statements have been prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB). IFRS Accounting Standards comprise the following authoritative literature:

- IFRS Accounting Standards;
- IAS Standards; and
- Interpretations developed by the IFRS Interpretations Committee (IFRIC Interpretations) or its predecessor body,
- the Standing Interpretations Committee (SIC Interpretations).

Fortress World Funds Limited SCC

Notes to the Financial Statements

September 30, 2025

(expressed in United States dollars)

2 Accounting policies...continued

a) Basis of preparation...continued

The financial statements have been prepared in accordance with the historical cost convention, as modified by the revaluation of financial assets held at fair value through profit or loss.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Fund's accounting policies. Although these estimates are based on management's best knowledge of current events and conditions, actual results could differ from these estimates. The areas involving a higher degree of judgement on complexity, or areas where assumptions and estimates are significant to the financial assets are disclosed in note 3.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

New and amended standards and interpretations

There are no standards, amendments to standards or interpretations that are effective for annual periods beginning on January 1, 2024, that have a material effect on the financial statements of the Fund.

New standards, amendments and interpretations effective after January 1, 2024, and that have not been early adopted

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after January 1, 2024, and have not been early adopted in preparing these financial statements.

The Fund's assessment of the impact of these new standards and amendments is set out below:

i) Amendments to the Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7 (effective for annual periods beginning on or after 1 January 2026)

The IASB issued targeted amendments to IFRS 9 and IFRS 7 to respond to recent questions arising in practice, and to include new requirements not only for financial institutions but also for corporate entities. Among other amendments, the IASB clarified the date of recognition and derecognition of some financial assets and liabilities, with a new exception for some financial liabilities settled through an electronic cash transfer system.

ii) IFRS 18 Presentation and Disclosure in Financial Statements (effective for annual periods beginning on or after 1 January 2027)

The IASB issued the new standard on presentation and disclosure in financial statements, which replaces IAS 1, with a focus on updates to the statement of profit or loss.

Fortress World Funds Limited SCC

Notes to the Financial Statements

September 30, 2025

(expressed in United States dollars)

2 Accounting policies...continued

a) Basis of preparation...continued

New standards, amendments and interpretations effective after January 1, 2024, and that have not been early adopted...continued

The key new concepts introduced in IFRS 18 relate to:

- the structure of the statement of profit or loss with defined subtotals;
- the requirement to determine the most useful structured summary for presenting expenses in the statement of profit or loss;
- required disclosures in a single note within the financial statements for certain profit or loss performance measures that are reported outside an entity's financial statements (that is, management-defined performance measures); and
- enhanced principles on aggregation and disaggregation which apply to the primary financial statements and notes in general.

The Fund is currently still assessing the effect of the forthcoming standard and amendments.

No other new standards or amendments to standards are expected to have a material effect on the financial statements of the Fund.

b) Foreign currency translation

Functional and presentation currency

Items included in the financial statements of the Funds are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The financial statements are presented in United States dollars which is the Funds' functional and presentation currency.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rate prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of comprehensive income.

Translation differences on non-monetary financial assets and liabilities such as securities held at fair value through profit or loss are recognised in the statement of comprehensive income as part of the fair value gain and loss.

Fortress World Funds Limited SCC

Notes to the Financial Statements

September 30, 2025

(expressed in United States dollars)

2 Accounting policies...*continued*

c) Financial assets and financial liabilities at fair value through profit or loss

i) Classification

Assets

The Fund classifies its investments based on both the Funds' business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The Funds are primarily focused on fair value information and use that information to assess the assets' performance and to make decisions. The Fund has not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income. Consequently, all investments are measured at fair value through profit or loss. Financial assets in the category at fair value through profit or loss have been so designated by management at inception since the assets form part of the managed portfolio whose performance is evaluated on a fair value basis in accordance with a documented investment strategy.

Liabilities

The Funds may make short sales in which a borrowed security is sold in anticipation of a decline in the market value of that security, or it may use short sales for various arbitrage transactions. Short sales are held for trading and are consequently classified as financial liabilities at fair value through profit or loss. Derivative contracts that have a negative fair value are presented as liabilities at fair value through profit or loss.

The Funds classifies all of its' investment portfolio as financial assets or liabilities as fair value through profit or loss.

The Funds' policies require the Investment Manager and the Board of Directors to evaluate the information about these financial assets and liabilities on a fair value basis together with other related financial information.

ii) Recognition, derecognition and measurement

Regular purchases and sales of investments are recognised on the trade date, which is the date the Funds commits to purchase or sell the investments. Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed as incurred in the statement of comprehensive income which include the bid-ask spread, fees and commissions paid to agents, advisers, brokers and dealers.

Financial assets at fair value through profit or loss are derecognised when the rights to receive cash flows from these assets have expired or the Funds have transferred substantially all risks and rewards of ownership.

Investments in other investment funds are valued on the basis of the net asset value per share as determined by the administrators of those investment vehicles in accordance with industry practice.

Fortress World Funds Limited SCC

Notes to the Financial Statements

September 30, 2025

(expressed in United States dollars)

2 Accounting policies...continued

c) Financial assets and financial liabilities at fair value through profit or loss...continued

ii) Recognition, derecognition and measurement...continued

All other financial assets at fair value through profit or loss are initially recognised at fair value and subsequently carried at fair value.

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the ‘financial assets or financial liabilities at fair value through profit or loss’ category are presented in the statement of comprehensive income within other net changes in fair value of financial assets and liabilities at fair value through profit or loss in the period in which they arise.

iii) Fair value estimation

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices at the close of trading on the reporting date. The quoted market price used for financial assets held by the Funds is the current exit price; the quoted market price for financial liabilities is the current exit price. If a significant movement in fair value occurs subsequent to the close of trading on the year end date, valuation techniques will be applied to determine the fair value. A significant event is any event that occurs after the last market price for a security, close of market or close of the foreign exchange, but before the Funds’ valuation time that materially affects the integrity of the closing prices for any security, instrument, currency or securities affected by that event so that they cannot be considered ‘readily available’ market quotations.

The fair value of financial assets and liabilities that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques or from other sources. The Funds use a variety of methods and makes assumptions that are based on market conditions existing at each reporting date. Valuation techniques used include the use of comparable recent arm’s length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity-specific inputs. Investments in other funds are measured on the net asset value per share as determined by the administrator of the fund.

iv) Transfers between levels of the fair value hierarchy

Transfers between levels of the fair value hierarchy are deemed to have occurred at the beginning of the reporting period.

Fortress World Funds Limited SCC

Notes to the Financial Statements

September 30, 2025

(expressed in United States dollars)

2 Accounting policies...continued

d) Cash and cash equivalents

Cash and cash equivalents are short term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash which are subject to insignificant changes in fair value. Cash includes deposits held at call with banks.

e) Expenses

Expenses are accounted for on an accrual basis. Expenses are charged to the statement of comprehensive income. In addition to the management fees and administration expenses, the Funds are responsible for the payment of all direct expenses relating to its operations such as audit, legal and professional fees.

f) Due from and due to brokers

Amounts due from and to brokers represent receivables for securities sold and payables for securities purchased, that have been contracted for but not yet settled or delivered by the statement of financial position date, respectively.

g) Equity

The Funds' two classes of segregated redeemable cell shares, the World Growth Fund shares and the World Fixed Income Fund shares are classified as equity.

Redeemable shares are classified as equity instruments when:

- The redeemable shares entitle the holder to a pro rata share of the Funds' net assets in the event of the funds' liquidation.
- The redeemable shares are in the class of instruments that is subordinate to all other classes of instruments.
- All redeemable shares in the class of instruments that is subordinate to all other classes of instruments have identical features.
- The redeemable shares do not include any contractual obligation to deliver cash or another financial asset other than the holder's rights to a pro rata share of the Funds' net assets.
- The total expected cash flows attributable to the redeemable shares over the life of the instrument are based substantially on the profit or loss, the change in the recognised net assets or the change in the fair value of the recognised and unrecognised net assets of the funds over the life of the instrument.

In addition to the redeemable shares having all of the above features, the Funds must have no other financial instrument or contract that has:

- Total cash flows based substantially on the profit or loss, the change in the recognised net assets or the change in the fair value of the recognised and unrecognised net assets of the funds.
- The effect of substantially restricting or fixing the residual return to the redeemable shareholders.

Fortress World Funds Limited SCC

Notes to the Financial Statements

September 30, 2025

(expressed in United States dollars)

2 Accounting policies...continued

g) Equity...continued

The Company continuously assesses the classification of the redeemable shares. If the redeemable shares cease to have all the features, or meet all the conditions set out, to be classified as equity, the Fund will reclassify them as financial liabilities and measure them at fair value at the date of reclassification, with any differences from the previous carrying amount recognised in equity. If the redeemable shares subsequently have all the features and meet the conditions to be classified as equity, the fund will reclassify them as equity instruments and measure them at the carrying amount of the liabilities at the date of the reclassification.

Each Fund issues redeemable shares which have all the features above and as such are classified as equity. Redeemable shares are redeemable at the holder's option and can be put back to a fund bi-weekly for cash equal to a proportionate share of that funds' net asset value. The redeemable shares equal the redemption amount that is payable at the statement of financial position date if the holders exercise the right to put the shares back to a Fund.

Each Funds' net asset value per redeemable mutual fund share is calculated by dividing the net assets attributable to those shares by the number of outstanding redeemable shares. In accordance with the provisions of each Funds' regulations, investment positions are valued based on the procedures described in note 2c for the purpose of determining the net asset value per share for subscriptions and redemptions.

h) Distributions payable to holders of redeemable cell shares

The Funds do not pay dividends or distributions to the holders of redeemable cell shares. All income, including interest, dividends and capital gains earned by the Funds, is automatically reinvested and this income is reflected in the quoted net asset value of the shares.

i) Taxation

The Company is licensed as an authorised mutual fund under the Mutual Funds Act, 2002-22 of Barbados. The Board of Directors have resolved that all of the net income of each cell is attributable to the Funds' redeemable mutual fund shareholders. In calculating the assessable income of the Funds for tax purposes, the Act provides for a deduction of up to 100% of the income that is designated to be the income of the Funds' shareholders.

3 Critical accounting estimates and assumptions

Management makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities are outlined below.

The estimates and assumptions that have a significant risk of causing material adjustment to the carrying value of assets and liabilities within the next financial year relate to the valuation of unquoted investments and the determination of impairment provisions. The fair value of such securities not quoted in an active market may be determined by the Funds using reputable pricing sources (such as pricing agencies) or indicative prices.

Fortress World Funds Limited SCC

Notes to the Financial Statements

September 30, 2025

(expressed in United States dollars)

3 Critical accounting estimates and assumptions...continued

The Funds would exercise judgement and estimates on the quantity and quality of pricing sources used. The determination of what constitutes 'observable' requires significant judgement by the Funds. The Funds consider observable data to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. Management policies surrounding these estimates and assumptions are disclosed in note 4.

4 Financial risk management

The Funds' activities expose them to a variety of financial risks: market risk (which includes price risk, interest rate risk and foreign currency risk), credit risk and liquidity risk.

The Funds are also exposed to operational risks such as custody risk. Custody risk is the risk of loss of securities held in custody occasioned by the insolvency or negligence of the custodian. Although an appropriate legal framework is in place that eliminates the risk of loss of value of the securities held by the custodian, in the event of its failure, the ability of the Fund to transfer securities might be temporarily impaired.

The Funds' overall risk management programme seeks to maximise the returns derived for the level of risk to which the Funds are exposed and seeks to minimise the potential adverse effect on the Funds' financial performance. The Funds' policy allows them to use derivative financial instruments to moderate certain risk exposures.

All securities investments present a risk of loss of capital. The maximum loss of capital on purchased options, long equity and debt securities is limited to the fair value of those positions. On written call options, short future positions and on equity and debt sold short, the maximum loss of capital can be unlimited. The maximum loss of capital on written put options, long futures and forward currency contracts is limited to the notional contract values of those positions.

The risk management policies employed by the Fund to manage these risks are discussed below. There are no changes in the risk management policies from the prior year.

The management of these risks is carried out by the investment manager under policies approved by the Board of Directors ('the Board'). The Board provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, the use of derivative financial instruments and non-derivative financial instruments and the investment of excess liquidity.

Fortress World Funds Limited SCC

Notes to the Financial Statements

September 30, 2025

(expressed in United States dollars)

4 Financial risk management...continued

Market risk

(i) Price risk

The Funds are exposed to equity securities price risk. Equity price risk is the risk of unfavourable changes in the fair values of equity instruments or equity-linked derivatives as the result of changes in the levels of equity indices and the value of individual shares.

The equity price risk exposure arises from the Funds' investments in equity securities and units in managed equity funds. To manage this risk, the Funds hold a diversified portfolio of investments in accordance with its investment policy. A summary of the overall statement of financial position market exposures as at September 30, 2025, is disclosed in note 5.

Sensitivity

Management's best estimate of the effect on profit or loss for a year due to a reasonably possible change in equity indices, with all other variables held constant is indicated in the table below. The analysis is based using the MSCI All Country World Index for the Fortress World Growth Fund and the Bloomberg Barclays US Aggregate Bond Index for the Fortress World Fixed Income Fund. The analysis is based on the assumptions that the MSCI All Country World Index increased by 15% (2024- 15%) and the Bloomberg Barclays US Aggregate Bond Index increased by 5% (2024- 5%), with all other variables held constant. In practice, the actual trading results may differ from the sensitivity analysis below and the difference could be material.

An equivalent decrease in each of the indices shown below would have resulted in an equivalent, but opposite, impact.

	2025	2024
	\$	\$
Effect on net assets attributable to redeemable shares of an increase in the indices		
Fortress World Growth Fund	1,337,617	1,348,119
Fortress World Fixed Income Fund	226,938	216,775

The Investment Manager uses the MSCI All Country World Index and the Bloomberg Barclays US Aggregate Bond Index as a reference point in evaluating portfolio risk and performance. However, the Investment Manager does not manage the Funds' investment strategy to track the MSCI All Country World Index, the Bloomberg Barclays US Aggregate Bond Index or any other index or external benchmark.

Fortress World Funds Limited SCC

Notes to the Financial Statements

September 30, 2025

(expressed in United States dollars)

4 Financial risk management...*continued*

Market risk...*continued*

(ii) Cash flows and fair value interest rate risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of market interest rates on the fair value of financial assets and liabilities and future cash flow. The majority of the Fund's financial assets and liabilities are non-interest bearing. As a result, the Fund is not subject to significant amounts of cash flow interest risk due to fluctuation in the prevailing levels of market interest rates. Any excess cash and cash equivalents are invested at short-term market interest rates. The effective yield is disclosed on cash and cash equivalents in note 6.

(iii) Foreign currency risk

The Funds hold financial assets with underlying exposure in currencies other than the United States dollars, the functional currency of the Funds. Consequently, except where assets and liabilities are denominated in currencies fixed to the United States dollar, the Funds are exposed to currency risk. The Funds policy is not to enter into any hedging transactions.

When the Investment Manager formulates a view on the future direction of foreign exchange rates and the potential impact on the Funds, the Investment Manager factors that into its portfolio allocation decisions.

While the Funds have direct exposure to foreign exchange rate changes on the price of non-United States-denominated securities, they may also be indirectly affected by the impact of foreign exchange rate changes on the earnings of certain companies in which the Funds invests, even if those companies' securities are denominated in United States dollars.

Foreign currency risk arises as the value of future transactions, recognised monetary assets and monetary liabilities denominated in other currencies fluctuate due to changes in foreign exchange rates. IFRS 7 considers the foreign exchange exposure relating to non-monetary assets and liabilities to be a component of market price risk not foreign currency risk. However, management monitors the exposure on all foreign currency denominated assets and liabilities.

At year end the Funds held no assets directly denominated in currencies other than United States dollars.

Credit risk

Credit risk is the risk that an issuer or counterparty to a financial instrument will be unable or unwilling to meet a commitment thereby causing a financial loss to the Funds. It is the Funds' policy to enter into financial instruments with reputable counterparties.

The main concentration to which the Funds are exposed arises from the Funds' investments in debt securities. The Funds are also exposed to counterparty credit risk on cash and cash equivalents, amounts due from brokers and other receivable balances.

Fortress World Funds Limited SCC

Notes to the Financial Statements

September 30, 2025

(expressed in United States dollars)

4 Financial risk management...*continued*

Credit risk...*continued*

Credit risk from debt securities is minimised through holding a diversified portfolio of investments, purchasing securities after careful assessment of the borrower and placing deposits with financial institutions with a strong capital base.

The maximum exposure of the Fund to the credit risk is set out in the following table:

	Fortress World Growth Fund	\$	Fortress World Fixed Income Fund	\$
September 30, 2025				
Cash and cash equivalents	<u>136,062</u>		<u>87,881</u>	
September 30, 2024				
Cash and cash equivalents	<u>172,820</u>		<u>10,680</u>	

The Funds measure credit risk and expected credit losses using probability of default, exposure at default and loss given default. Management considers both historical analysis and forward-looking information in determining any expected credit loss. At September 30, 2025, all cash and short-term deposits are held with counterparties with a credit rating of BBB+ or equivalent and are due to be settled within 1 week. Management considers the probability of default to be close to zero as the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12-month expected credit losses as any such impairment would be wholly insignificant to the Funds.

Liquidity risk

Liquidity risk is the risk that the Funds may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The Funds are exposed to weekly cash redemptions of Redeemable Cell Shares (note 8). The table below analyses the Funds' financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date.

Fortress World Funds Limited SCC

Net assets attributable to holders of redeemable mutual fund shares	5,721,200	—
Total financial liabilities	5,721,200	1,418

Redeemable shares are redeemed on demand at the holder's option (note 8). In the event of unusual circumstances and redemption requests representing more than 20% of a Funds' assets being received within 30 consecutive days, the directors of the Funds reserve the right to suspend redemptions and to hold a special meeting of the Fund shareholders to determine the future of the Funds, including the liquidation of the Funds' assets.

Fortress World Funds Limited SCC

Notes to the Financial Statements

September 30, 2025

(expressed in United States dollars)

4 Financial risk management...*continued*

Liquidity risk...*continued*

At September 30, 2025, 100% (2024 - 100%) of financial assets at fair value through profit or loss for the Funds, comprise of investments in other funds that have been fair valued in accordance with the policies set out in note 2c. Since the shares of the other funds are not publicly traded, redemption can only be made by the Funds on the redemption dates and subject to the required notice periods specified in the offering documents of each of the other funds.

The rights of the Funds to request redemption of its investments in other funds may vary in frequency from daily to monthly redemptions. As a result, the carrying values of the other funds may not be indicative of the prevailing values ultimately realised on redemption. In addition, the Funds may be materially affected by the actions of other investors who have invested in funds in which the Funds has invested.

The Funds manage its liquidity risk by investing predominantly in securities that it expects to be able to liquidate within 1 week or less. The following table illustrates the expected liquidity of assets held.

	Less than 1 week	1 week- 1 month

Capital risk management

The capital of each Fund is represented by the net assets attributable to holders of redeemable shares. The amount of net asset attributable to holders of redeemable shares can change significantly on a weekly basis as the Funds are subject to weekly subscriptions and redemptions at the discretion of shareholders. The Funds' objective when managing capital is to safeguard the Funds' ability to continue as a going concern in order to provide returns for shareholders and to maintain a strong capital base to support the development of the investment activities of the Funds.

Fortress World Funds Limited SCC

Notes to the Financial Statements

(expressed in United States dollars)

4 Financial risk management...*continued*

Fair value estimation

The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices at the close of trading on the year end date. The quoted market price used for financial assets held by the Funds is the current exit price; the quoted market price for financial liabilities is the current exit price. If a significant movement in fair value occurs subsequent to the close of trading on the year end date, valuation techniques will be applied to determine the fair value.

An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

The Funds are required to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety.

For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgment by each Fund. Each Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Fortress World Funds Limited SCC

Notes to the Financial Statements

September 30, 2025

(expressed in United States dollars)

4 Financial risk management...*continued*

Fair value estimation...*continued*

The following tables analyse within the fair value hierarchy each Funds' financial assets and liabilities (by class) measured at fair value:

	Level 1 \$	Level 2 \$	Level 3 \$	Total \$
September 30, 2025				
Financial assets at fair value through profit or loss:				
Fortress World Growth Fund				
Mutual funds	—	11,252,325	—	11,252,325
Fortress World Fixed Income Fund				
Mutual funds	—	5,765,973	—	5,765,973
September 30, 2024				
Financial assets at fair value through profit or loss:				
Fortress World Growth Fund				
Mutual funds	—	10,328,907	—	10,328,907
Fortress World Fixed Income Fund				
Mutual funds	—	5,711,938	—	5,711,938

Investments whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities, listed close-ended mutual funds and traded government debt securities. The Funds do not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include investment-grade corporate bonds, untraded government securities and unlisted mutual funds. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Fortress World Funds Limited SCC

6 Cash and cash equivalents

Cash and cash equivalents are placed with leading commercial banks. There are no cash equivalents at the end of the financial year. The effective yield on cash is nil.

7 Related party transactions

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

Fortress Fund Managers Limited serves as manager and administrator of the Funds. As a result of providing management and administrator services, Fortress Fund Managers Limited receives a weekly management and administration fee based on the actual net asset value of the Funds, calculated weekly and payable in arrears. The gross management fee being 0.60% - 1.25% amounted to \$163,783 (2024- \$147,537) for the year. The administrator fees amounted to \$12,032 (2024 - \$10,987) for the year.

Management fees of \$121,646 (2024- \$109,149) were refunded by Fortress Fund Managers Limited being 0.35% - 1.00% of the net asset values of Fortress International Equity Fund Limited SP, Fortress Emerging Markets Fund SP, Fortress US Equity Fund SP and Fortress Fixed Income Fund SP shares held by the Funds during the year. This is to avoid double charging of management fees on assets invested in related funds which have the same Manager.

8 Capital management

The authorized share capital of the Company is divided into 1,000 voting, non-redeemable management shares and unlimited redeemable Cell shares without nominal or par value which may be issued in classes. Each class of shares participates in a Segregated Portfolio.

Management shares carry one vote each. No other shares have a right to receive notice, attend or vote at the general meetings of the Company. Management shares do not have a right to dividends. On a winding up of the Company, management shares rank only for a return of the nominal amount paid up thereon provided the Funds has sufficient assets after settlement of all obligations to creditors and the holders of participating shares. The management shares are held by the investment manager, Fortress Fund Managers Limited.

Redeemable segregated Cell Shares (cell shares)

Redeemable participating shares were sold during the initial offering at a price of \$1, and thereafter, any subsequent issuance and redemptions are valued at the applicable net asset value per participating redeemable share on the valuation date. Holders of redeemable participating shares have the right to redeem or require the funds to repurchase their shares. A redemption notice or repurchase request must be submitted to the Administrator at least 1 business day prior to the valuation date.

Holders of redeemable participating shares are entitled to an equal share in the distribution of net income and net capital gains of the Fund and participates equally in all other respects. Fund shareholders shall not be entitled to vote at meetings of shareholders of the Fund save and except as permitted under the Companies Act, CAP 308, for the following:

- i) Disposal of substantially all of the Assets of the Fund, other than the course of ordinary business.
- ii) Any change or abrogation of the rights of the shares or any variation affecting the rights of the shares.
- iii) Any proposed amalgamation of the Fund or any amalgamation of the Fund.
