

Fortress Caribbean
PENSION FUND

ANNUAL REPORT 2019

Fortress
FUND MANAGERS

Fortress Fund Managers is a Barbados-based investment manager. We have been providing top-ranked returns, open communication and accessible service to our clients since 1996.

We offer a range of funds and investment products to meet the needs of individuals and institutions. In each case, our main goal is to achieve consistent long-term returns for our clients. We do this by applying sound, disciplined processes to our investments in equities, fixed income and real estate. We offer products with global reach, as well as those that focus primarily on the Caribbean region.

Please feel free to contact us to learn more about this Fund, or any of our products.

Fortress Caribbean
Pension Fund

Investment Objectives & Fund Details

The Fortress Caribbean Pension Fund offers three classes of shares to defined contribution and defined benefit pension plans and their participants: Redeemable Aggressive Accumulator (AA), Redeemable Conservative Consolidator (CC) and the Redeemable Capital Secure (CS), each with its own investment objective. The objective of the AA class of share is to achieve growth and capital appreciation of the assets over the long term. The investment objective of the CC class of share is to achieve growth and capital appreciation over the medium term, while that of the CS class of share is to achieve capital security in the short term.

Fortress Caribbean Pension Fund Limited ("the Fund") is an open-ended mutual fund company and was incorporated on October 9, 2002 under the provisions of the Mutual Funds Act of Barbados. The Fund maintains its registered office at First Floor, Carlisle House, Hincks Street, Bridgetown, Barbados.

Important information about this Fund is contained in its prospectus, which we encourage you to read before making an investment. The indicated returns in this document are net of all fees and expenses. Returns are historical and are not necessarily indicative of future performance. Investors should be aware that there are risks involved where the value of the Fund's shares may go down as well as up. A copy of the prospectus may be obtained from the offices of Fortress Fund Managers, or downloaded at www.fortressfund.com.

Background

Fortress Caribbean Pension Fund Limited (“Pension Fund”) is a mutual fund company incorporated in Barbados and licensed under the Mutual Funds Act 2002-22.

Fortress Fund Managers Limited (“Fortress”) has been manager of the Fund since its inception.

The Pension Fund was established in 2002 in response to the growing trend of companies favouring Defined Contribution (DC) pension plans over Defined Benefit (DB) pension plans. In DC plans, contribution rates are fixed by employer and employee, and members bear 100% of the investment and longevity risks as there are no guarantees to the level of pension that can be provided at retirement with the member’s funds.

Recognising that members at different ages have different investment risks and objectives, the Pension Fund has been structured to allow members to direct their own funds as they see fit into one of three investment shares – Aggressive Accumulator (AA) Share,

Conservative Consolidator (CC) Share and Capital Secure (CS) Share. Each share has a different asset allocation make-up, from being “aggressive” to “conservative,” thus catering to members who have changing risk/reward objectives as they progress towards retirement.

Where the Pension Fund invests in other funds managed by Fortress, there is a rebate system in place for the Pension Fund to avoid double charging of management fees.

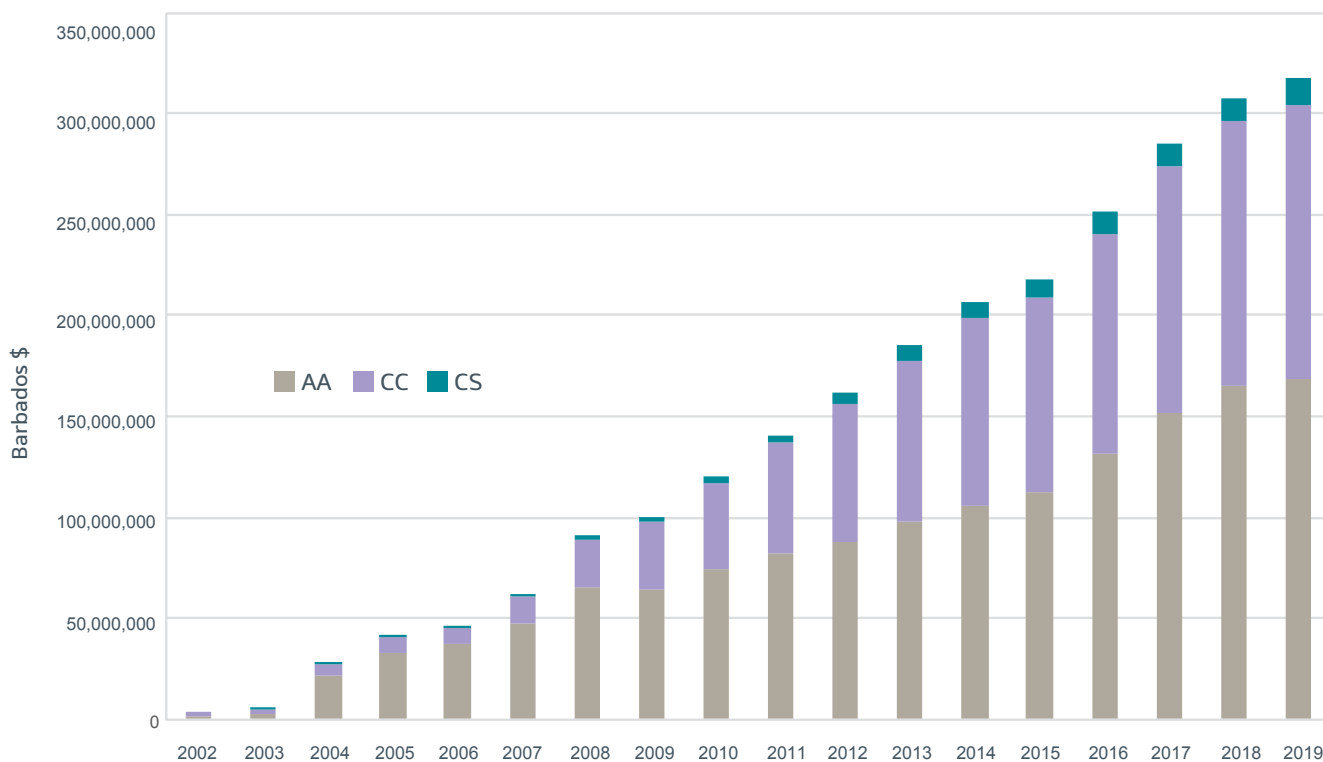

Fortress provides both record keeping and investment services to DC plans that invest in the Pension Fund, and investment only services to DB pension plans.

Members of DC plans can access their accounts through our website and are also able to use our pension projection tool on the website.

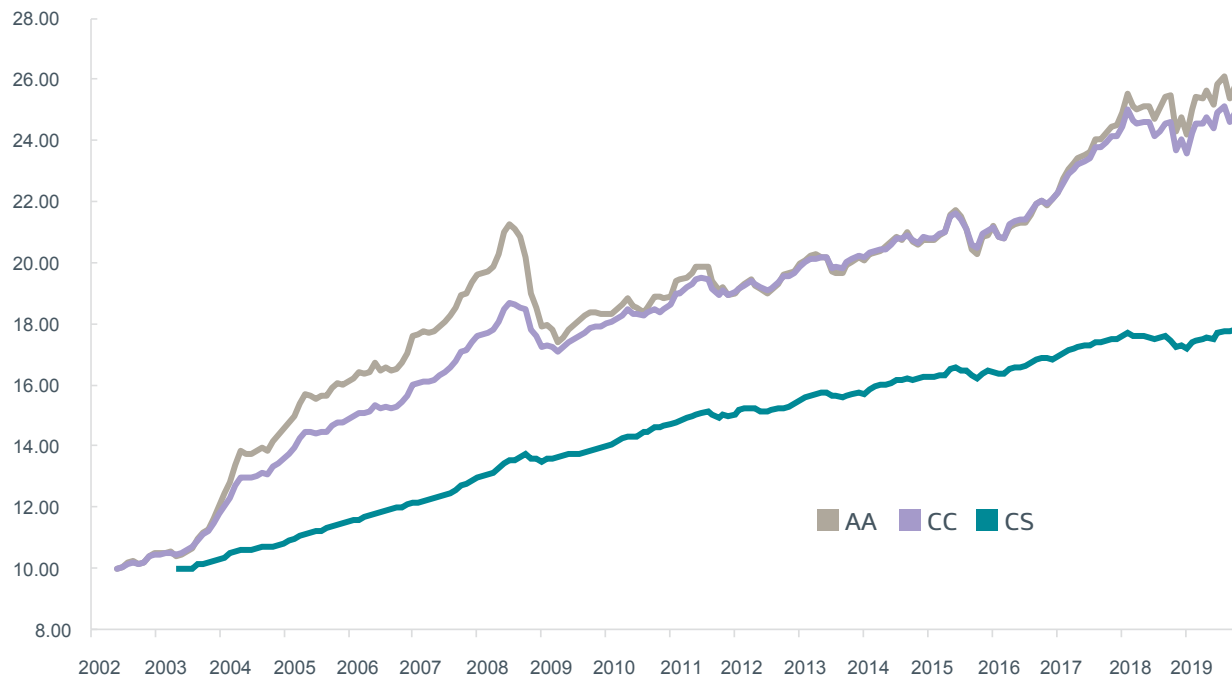

As of September 30, 2019 approximately 70 companies are investing in the Pension Fund and record keeping services are being provided for over 4,500 employees.

■ FIXED INCOME	89%
■ REAL ESTATE/OTHER	1%

Directors' Report

“... the well-valued areas in which our investments are focused have substantial future return potential from today’s prices.”

Directors’ Report

Investment Director Roger Cave

The Fortress Caribbean Pension Fund had positive returns across all classes of share for the year ended September 30, 2019. The AA share gained 1.1%, the CC share 1.4% and the CS share 2.2%. Equity returns were marginally positive this year and fixed income returns were slightly higher. Since inception in 2002, the annual compound returns for the AA, CC and CS shares have been 5.6%, 5.4% and 3.6% respectively. Total net assets of the Fund increased from \$307 million to \$318 million during the year, reflecting new subscriptions and increases from investment returns.

The equity allocations of the three shares of the Pension Fund are primarily made up of investments in the **Fortress Caribbean Growth Fund**, the fixed income allocations are primarily made up of investments in the **Fortress Caribbean High Interest Fund**, and the small allocations to real estate are typically made through the Eppley Caribbean Property Fund SCC (formerly Fortress Caribbean Property Fund SCC). The returns of the three shares in the Pension Fund are therefore primarily a blend of the performance returns of these underlying funds.

Fortress Caribbean Growth Fund

The Fortress Caribbean Growth Fund was little changed this year, registering a 0.3% gain for the year ended September 30, 2019. The Fund’s assets increased from \$480 million to \$492 million. Its annual compound rate of return since inception in 1996 is now 8.3% per year.

Global financial markets came under severe pressure towards the end of calendar 2018, reaching a low point in the final days of the year. Investors at that point were worried about rising trade tensions and the possibility that further rate hikes by the U.S. Federal Reserve (Fed) would lead to a recession. By late December, though, the Fed had begun to signal that its tightening cycle was likely done and that it would move to cutting rates, especially if global uncertainties persisted. That is exactly what happened, and the hope and then reality of lower rates led to a strong equity market recovery through most of 2019 even as trade tensions persisted. The net effect of all this for the year ended September 30, 2019 was marginal gains in U.S. equities and small declines in international and emerging markets shares. Overall there was little change in the Fund’s global investments during the year.

In the Caribbean, the Jamaican stock market continued its five-year bull market with another large advance. Stocks in Barbados and Trinidad showed far less movement, with Barbados declining and the increase in the Trinidad index attributable primarily to the contribution of the Jamaican shares that are cross-listed there. While Jamaican companies have been benefiting from improved earnings and government fiscal performance, those in Trinidad and Barbados have continued to face lacklustre economic growth and high government debt. The Fund’s holdings in Jamaica shares such as NCB Financial Group contributed significant gains to the Fund which were only partly offset by declines in Barbados

holdings like Goddard Enterprises.

The Fund's portfolio is a mix of regional Caribbean and international stocks, held both directly and via allocations to other funds. Two-thirds of the portfolio is invested outside the Caribbean in developed international and emerging markets, offering investors instant diversification. Our investment objective remains unchanged: to own shares in well-run businesses which are trading at attractive prices relative to their earnings and balance sheet fundamentals. Based on the current set of well-valued opportunities within regional and global markets, we are more constructive today than we have been in years and the Fund is pretty much fully invested.

Fortress Caribbean High Interest Fund

The Fortress Caribbean High Interest Fund returned 3.1% in the year ended September 30, 2019, a steady result against the backdrop of very low global interest rates and the aftermath of the recent Government bond restructuring in Barbados. Assets increased from \$132 million to \$137 million. The Fund's compound annual return since inception in 2002 is now 4.1% per year, net of all fees and expenses. Its investment objective continues to be the highest level of income consistent with the preservation of capital.

The Fund generated a positive return for the year as global bond prices rose and more of the Fund's Barbados dollar cash was put to work earning higher returns. Global bonds rallied strongly after the U.S. Federal Reserve (Fed) moved from raising interest rates to lowering them. The Fed wound up cutting its target rate twice in 2019. The Fund's investments in the US\$ Fortress Fixed Income Fund and other US and global bonds achieved high single digit returns in this environment of falling rates, contributing to the Fund's overall result.

The Government of Barbados (GOB) domestic debt restructuring and exchange was finalised early in the year and some secondary market trading developed in the new "post-restructuring" bonds. With the most

acute default risk now passed, we took a measured approach to adding GOB exposure back in the Fund, starting with some of the new Series F bonds at yields of approximately 7.5%. This and other new investments that reduced the cash levels in the Fund helped increase the average yield in the portfolio and add to returns during the year.

Even though the Fund's cash balance was reduced significantly during the year, it was still higher than desired. We expect cash levels to continue to decline as more investments are made in the months ahead, and for the Fund's average yield to rise incrementally as a result.

The Fund's portfolio continues to be as diversified as possible given the constraints and controls in place in Barbados and the limited capital markets in the region. Its holdings are a mix of Barbados corporate bonds, a small but growing allocation to government securities, a wide range of high-quality global bonds accomplished via the US\$ Fortress Fixed Income Fund and directly, investments in specialised funds, and cash on deposit with CIBC FirstCaribbean, the Fund's Custodian Trustee. The gross yield of the Fund's portfolio is approximately 3.3%, a good estimate of its return potential in the medium-term.

Asset Allocation & Outlook

The Fortress Caribbean Growth Fund recently reopened to lump sum subscriptions of all kinds after approximately two years of being open only for subscriptions from pensions and monthly savings programmes. The Fortress Caribbean High Interest Fund remains temporarily closed to new lump-sum subscriptions and is open exclusively to pensions and monthly savers. Of course, redemptions operate as normal. The Fortress Caribbean Pension Fund maintained steady access to the underlying Fortress funds throughout and continues to do so.

As in recent years, we have maintained the maximum allocations to equities in each of the three share classes.

This is in line with our assessment that the equity component represents the best diversification and embedded return potential. Value is not everywhere in regional or global stock markets, but the well-valued areas in which our investments are focused have substantial future return potential from today's prices. Bonds, on the other hand, continue to face the dual challenges of low yields in global markets and persistent credit risks in the government-dominated bond markets of the Caribbean. Return expectations remain below historical averages in fixed income. Looking forward, we expect the Fund's returns over the next few years to be in the mid-single digits for the AA and CC shares and in the low-mid single digits for the CS share, reflecting the differing asset allocations of the shares.

We remain concerned that due to tax changes in recent years individuals' contributions to registered pension plans are still potentially subject to double taxation: once as they are earned and again when they are paid out from the plan as an annuity or income drawdown. This is an important and easy situation to fix. We understand that there are acute financial pressures on the government and we support the direction of the long overdue adjustments now being made. At the same time, it is critical to the long-term financial health of the

country to encourage and enable (or, at a minimum, not discourage) persons to save and invest for their own financial security in retirement. We encourage all members and sponsors of pension plans to continue to give this issue the prominence it deserves.

If you would like to learn more about the performance and positioning of the main underlying funds in which the Pension Fund invests, please see the annual and quarterly reports of the Fortress Caribbean Growth Fund and the Fortress Caribbean High Interest Fund, available to view or download at www.fortressfund.com.

Thank you to all our pension plan participants and sponsors for investing with us. We will continue to invest your savings with a disciplined focus on the long-term.

INDEPENDENT AUDITOR'S REPORT

TO THE SHAREHOLDERS OF FORTRESS CARIBBEAN PENSION FUND LIMITED

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Fortress Caribbean Pension Fund Limited (“the Fund”), which comprise the statement of financial position as at 30 September 2019, and the statement of changes in net assets attributable to holders of redeemable mutual fund shares, statement of comprehensive income, and statement of cash flows for the year then ended, notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at 30 September 2019 and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (“IFRS”).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (“ISAs”). Our responsibilities under those standards are further described in the *Auditor’s Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the International Ethics Standards Board for Accountants’ Code of Ethics for Professional Accountants (“IESBA Code”), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and the Board of Directors for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

The Audit Committee is responsible for overseeing the Fund’s financial reporting process.

INDEPENDENT AUDITOR'S REPORT

TO THE SHAREHOLDERS OF FORTRESS CARIBBEAN PENSION FUND LIMITED

Report on the Audit of the Financial Statements (Continued)

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other Legal Matters

This report is made solely to the Fund's shareholders, as a body, in accordance with Section 147 of the Companies Act of Barbados. Our audit work has been undertaken so that we might state to the Fund's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law and subject to any enactment or rule of law to the contrary, we do not accept or assume responsibility to anyone other than the Fund and the Fund's shareholders as a body, for our audit work, for this report, or for the opinion we have formed.

Notes to Financial Statements

September 30, 2019

(expressed in Barbados dollars)

1 Incorporation and principal activity

The Fund was incorporated in Barbados on October 9, 2002 under the Companies Act of Barbados and is licensed under the Mutual Funds Act 2002-22 of Barbados as an authorised mutual fund. The Fund maintains its registered office at 1st Floor, Carlisle House, Hincks Street, Bridgetown, Barbados.

The primary objective of each class of share is stated below:

The investment objective of the Aggressive Accumulator (AA) class of shares is to achieve growth and capital appreciation of the assets over the long term.

The investment objective of the Conservative Consolidator (CC) class of shares is to achieve growth and capital appreciation of the assets over the medium term.

The investment objective of the Capital Secure (CS) class of shares is to achieve the highest possible return compatible with the preservation of capital in the short term.

The Fund's investment and administration activities are managed by Fortress Fund Managers Limited ("the Investment Manager").

These financial statements were authorised for issue by the Board of Directors on December 12, 2019.

2 Summary of significant accounting policies

The principal accounting policies adopted in the preparation of the financial statements are set out below. These policies have been consistently applied to all years presented unless otherwise stated.

a) Basis of presentation

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") and IFRS Interpretations Committee (IFRS IC) promulgated by the International Accounting Standards Board (IASB), applicable to entities reporting under IFRS. The financial statements have been prepared in accordance with the historical cost convention, as modified by the revaluation of financial assets held at fair value through profit or loss.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Fund's accounting policies. Although these estimates are based on management's knowledge of current events and conditions, actual results could differ from these estimates. The areas involving a higher degree of judgement on complexity, or areas where assumptions and estimates are significant to the financial assets are disclosed in note 3.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Fortress Caribbean Pension Fund Limited

Notes to Financial Statements

2 Summary of significant accounting policies ...continued

a) Basis of presentation ...continued

New and amended standards adopted by the Fund

IFRS 9 'Financial Instruments' became effective for annual periods beginning on or after January 1, 2018. It addresses the classification, measurement and derecognition of financial assets and liabilities and replaces the multiple classification and measurement models in IAS 39. The Fund adopted the standard on October 1, 2018.

Classification and measurement of debt assets is driven by the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets. A debt instrument is measured at amortised cost if the objective of the business model is to hold the financial asset for the collection of the contractual cash flows and the contractual cash flows under the instrument solely represent payments of principal and interest (SPPI). A debt instrument is measured at fair value through other comprehensive income if the objective of the business model is to hold the financial asset both to collect contractual cash flows from SPPI and to sell. All other debt instruments must be recognised at fair value through profit or loss. An entity may however, at initial recognition, irrevocably designate a financial asset as measured at fair value through profit or loss if doing so eliminates or significantly reduces a measurement or recognition inconsistency. Derivative and equity instruments are measured at fair value through profit or loss unless, for equity instruments not held for trading, an irrevocable option is taken to measure at fair value through other comprehensive income. IFRS 9 also introduces a new expected credit loss (ECL) impairment model.

IFRS 9 has been applied retrospectively by the Fund and did not result in a change to the classification or measurement of financial instruments as outlined in note 5. The Fund's investment portfolio continues to be classified as fair value through profit or loss and other financial assets which are held for collection continue to be measured at amortised cost. There was no material impact on adoption from the application of the new impairment model.

There are no other standards, amendments to standards or interpretations that are effective for annual periods beginning on or after January 1, 2018 that have a material effect on the financial statements of the Fund.

b) Foreign currency translation

Functional and presentation currency

Items included in the Fund's financial statements are measured using the currency of the primary economic environment in which it operates ("the functional currency"). The financial statements are presented in Barbados dollars which is the Fund's functional and presentation currency.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rate prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such

Fortress Caribbean Pension Fund Limited

Notes to Financial Statements

September 30, 2019

(expressed in Barbados dollars)

2 Summary of significant accounting policies ...continued

b) Foreign currency translation...continued

transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of comprehensive income.

Translation differences on non-monetary financial assets and liabilities such as equities held at fair value through profit or loss are recognised in the statement of comprehensive income as part of net (loss)/gain on financial assets at fair value through profit or loss.

c) Financial assets and financial liabilities at fair value through profit or loss

i) Classification

Assets

The Fund classifies its investments based on both the Fund's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The Fund is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. The Fund has not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income. The contractual cash flows of the Fund's debt securities are solely principal and interest, however, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Fund's business model's objective. Consequently, all investments are measured at fair value through profit or loss. Financial assets in the category at fair value through profit or loss have been so designated by management at inception since the assets form part of the managed portfolio whose performance is evaluated on a fair value basis in accordance with a documented investment strategy.

Liabilities

The Fund makes short sales in which a borrowed security is sold in anticipation of a decline in the market value of that security, or it may use short sales for various arbitrage transactions. Short sales are held for trading and are consequently classified as financial liabilities at fair value through profit or loss. Derivative contracts that have a negative fair value are presented as liabilities at fair value through profit or loss.

As such, the Fund classifies all of its investment portfolio as financial assets or liabilities as fair value through profit or loss.

The Fund's policy requires the Investment Manager and the Board of Directors to evaluate the information about these financial assets and liabilities on a fair value basis together with other related financial information.

Fortress Caribbean Pension Fund Limited

Notes to Financial Statements

September 30, 2019

(expressed in Barbados dollars)

2 Summary of significant accounting policies ...continued

c) Financial assets and financial liabilities at fair value through profit or loss ...continued

ii) Investments in financial assets previously designated at fair value through profit or loss

The Fund holds mutual funds \$311,663,993 (2018- \$294,635,910), listed equities and mutual funds \$4,612,243 (2018- \$4,762,605) hedge funds \$21,238 (2018- \$136,226), and government back securities \$1,375,267 (2018- \$1,424,568) which had previously been designated at fair value through profit or loss. On adoption of IFRS 9 these securities are mandatorily classified as fair value through profit or loss.

iii) Recognition, derecognition and measurement

Regular purchases and sales of investments are recognised on the trade date, which is the date the Fund commits to purchase or sell the investments. Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed as incurred in the statement of comprehensive income which include the bid-ask spread, fees and commissions paid to agents, advisers, brokers and dealers.

Financial assets at fair value through profit or loss are derecognised when the rights to receive cash flows from these assets have expired or the Fund has transferred substantially all risks and rewards of ownership.

When the Fund purchases an option, an amount equal to fair value which is based on the premium paid is recorded as an asset. When the Fund writes an option, an amount equal to fair value which is based on the premium received by the Fund is recorded as a liability. When options are closed, the difference between the premium and the amount paid or received, net of brokerage commissions or the full amount of the premium, if the option expires worthless, is recognised as a gain or loss and is presented in the statement of comprehensive income within other net changes in fair value of financial assets and liabilities at fair value through profit or loss.

The Fund's interests in jointly controlled entities are initially recognised at fair value and are subsequently carried at fair value based on the Fund's proportionate share of the underlying fair value of the entity's net assets.

Investments in other investment funds are valued on the basis of the net asset value per share as determined by the administrators of those investment vehicles in accordance with industry practice.

All other financial assets at fair value through profit or loss are initially recognised at fair value and subsequently carried at fair value.

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the 'financial assets or financial liabilities at fair value through profit or loss' category are presented in the statement of comprehensive income within other net changes in fair value of financial assets and liabilities at fair value through profit or loss in the period in which they arise.

Fortress Caribbean Pension Fund Limited

Notes to Financial Statements

September 30, 2019

(expressed in Barbados dollars)

2 Summary of significant accounting policies ...continued

c) Financial assets and financial liabilities at fair value through profit or loss ...continued

iii) Recognition, derecognition and measurement ...continued

Dividend income from financial assets at fair value through profit or loss is recognised in the statement of comprehensive income within dividend income when the Fund's right to receive payments is established. Interest on debt securities at fair value through profit or loss is recognised in the statement of comprehensive income.

iv) Fair value estimation

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices at the close of trading on the reporting date. The quoted market price used for financial assets held by the Fund is the current exit price; the quoted market price for financial liabilities is the current exit price. If a significant movement in fair value occurs subsequent to the close of trading on the year end date, valuation techniques will be applied to determine the fair value. A significant event is any event that occurs after the last market price for a security, close of market or close of the foreign exchange, but before the Fund's valuation time that materially affects the integrity of the closing prices for any security, instrument, currency or securities affected by that event so that they cannot be considered 'readily available' market quotations.

The fair value of financial assets and liabilities that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques or from other sources. The Fund uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date. Valuation techniques used include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity-specific inputs. Investments in other funds are measured on the net asset value per share as determined by the administrator of the fund.

v) Transfers between levels of the fair value hierarchy

Transfers between levels of the fair value hierarchy are deemed to have occurred at the beginning of the reporting period.

Fortress Caribbean Pension Fund Limited

Notes to Financial Statements

September 30, 2019

(expressed in Barbados dollars)

2 Summary of significant accounting policies ...continued

d) Cash and cash equivalents

Cash and cash equivalents are short term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash which are subject to insignificant changes in fair value.

e) Investment income

Interest income

Interest income is recognised in the statement of comprehensive income for all interest-bearing instruments on an accrual basis using the effective interest method. Interest income relates to coupons earned on fixed income investments and short-term deposits.

Dividend income

Dividend income is recognised when the Fund's right to receive payment is established.

f) Expenses

Expenses are accounted for on an accrual basis. Expenses are charged to the statement of comprehensive income. In addition to the management fees and administration expenses, the Fund is responsible for the payment of all direct expenses relating to its operations such as audit, legal and professional fees.

g) Redeemable mutual fund shares/net asset value

The Fund issues redeemable mutual fund shares which are redeemable at the holder's option and are classified as financial liabilities. The Fund's net asset value per redeemable mutual fund share is calculated by dividing the net assets attributable to those shares by the number of outstanding redeemable shares. In accordance with the provisions of the Fund's regulations, investment positions are valued based on the procedures described in note 2c for the purpose of determining the net asset value per share for subscriptions and redemptions.

h) Distributions payable to holders of redeemable mutual fund shares

The Fund does not pay dividends or distributions to the holders of redeemable mutual fund shares. All income, including interest, dividends and capital gains earned by the Fund, is automatically reinvested and this income is reflected in the net asset value of the shares.

i) Taxation

The Fund is licensed as an authorized mutual fund under the Mutual Funds Act, 2002-22 of Barbados. The Directors have resolved that all of the net income of the Fund is attributable to the Fund's redeemable mutual fund shareholders. In calculating the assessable income of the Fund for tax purposes, the Act provides for a deduction of up to a 100% of the income that is designated to be the income of the Fund shareholders.

Fortress Caribbean Pension Fund Limited

Notes to Financial Statements

September 30, 2019

(expressed in Barbados dollars)

3 Critical accounting estimates and assumptions

Management makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities are outlined below.

The estimates and assumptions that have a significant risk of causing material adjustment to the carrying value of assets and liabilities within the next financial year relate to the valuation of unquoted investments and the determination of impairment provisions. The fair value of such securities not quoted in an active market may be determined by the Fund using reputable pricing sources (such as pricing agencies) or indicative prices.

The Fund exercises judgement and estimates on the quantity and quality of pricing sources used. The determination of what constitutes ‘observable’ requires significant judgement by the Fund. The Fund considers observable data to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. Management policies surrounding these estimates and assumptions are disclosed in note 4.

4 Financial risk management

The Fund’s activities expose it to a variety of financial risks: market risk (which includes price risk, interest rate risk and foreign currency risk), credit risk and liquidity risk.

The Fund’s overall risk management programme seeks to maximise the returns derived for the level of risk to which the Fund is exposed and seeks to minimise the potential adverse effect on the Fund’s financial performance. The Fund’s policy allows it to use derivative financial instruments to moderate certain risk exposures.

The risk management policies employed by the Fund to manage these risks are discussed below. There are no changes in the risk management policies from the prior year.

The management of these risks is carried out by the investment manager under policies approved by the Board of Directors (“the Board”). The Board provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, the use of derivative financial instruments and non-derivative financial instruments and the investment of excess liquidity.

Fortress Caribbean Pension Fund Limited

Notes to Financial Statements

September 30, 2019

(expressed in Barbados dollars)

4 Financial risk management...continued

Market risk

i) Price risk

Equity price risk is the risk of unfavourable changes in the fair values of equity instruments or equity-linked derivatives as the result of changes in the levels of equity indices and the value of individual shares.

The equity price risk exposure arises from the Fund's investments in equity securities and units in managed equity funds. To manage this risk the Fund holds a diversified portfolio of investments in accordance with its investment policy. A summary of the overall consolidated statement of financial position market exposures at September 30, 2019 is disclosed in note 5.

Sensitivity

Management's best estimate of the effect on profit or loss for a year due to a reasonably possible change in equity indices, with all other variables held constant is indicated in the table below. The analysis is based on the assumptions that the MSCI All Country World Index increased by 13% (2018- 8%) and the Bloomberg Barclays US Aggregate Bond Index increased by 3% (2018- 3%), with all other variables held constant, and that the fair value of the Funds' portfolio of equity securities and equity-based investments moved according to their historical correlation with the indices. In practice, the actual trading results may differ from the sensitivity analysis below and the difference could be material. An equivalent decrease in each of the indices shown below would have resulted in an equivalent, but opposite, impact.

	2019	2018
	\$	\$
Effect on net assets attributable to redeemable shares of an increase in the indices		
Aggressive Accumulator	10,164,823	8,433,811
Conservative Consolidator	6,619,300	5,750,512
Capital Secure	147,948	211,301

The Investment Manager uses the MSCI All Country World Index as a reference point in making investment decisions. However, the Investment Manager does not manage the Fund's investment strategy to track the MSCI All Country World Index or any other index or external benchmark.

ii) Cash flows and fair value interest rate risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of market interest rates on the fair value of financial assets and liabilities and future cash flow. The Fund holds fixed interest securities that expose the Fund to fair value interest rate risk. The Fund's significant interest-bearing financial assets earn interest at fixed rates and therefore the cash flows of the Fund are not affected by fluctuations in the prevailing levels of market interest rates. The Fund therefore has no significant interest rate risk on its cash flows.

The majority of the Fund's financial assets and liabilities of the Fund are non-interest bearing. The Fund would be impacted by movement in the market interest rates on the maturity of short term fixed rate instruments which would have to be reinvested at different rates of return.

Fortress Caribbean Pension Fund Limited

Notes to Financial Statements

September 30, 2019

(expressed in Barbados dollars)

4 Financial risk management ...continued

Market risk ...continued

ii) Cash flows and fair value interest rate risk...continued

The following table indicates the sensitivity to the fair value of the Fund's long term fixed rate financial assets at fair value through profit or loss, to a reasonable possible change in interest rates with all other variables being constant.

	2019	2018
	Effect on	Effect on
	net income	net income
	\$	\$
Conservative Consolidator		
Change in interest rate:		
-2%	734,839	15,721
2%	(420,103)	(15,167)

The Fund has direct exposure to interest rate changes on the valuation and cash flows of its interest bearing assets and liabilities. However, it may also be indirectly affected by the impact of interest rate changes on the earnings of certain companies in which the Fund invests and impact on the valuation of certain over-the-counter derivative products that use interest rates as an input in their valuation model.

Therefore, the above sensitivity analysis may not fully indicate the total effect on the Fund's net assets attributable to holders of redeemable shares of future movements in interest rates.

iii) Foreign currency risk

The Fund holds financial assets denominated in currencies other than Barbados dollars, the functional currency of the Fund. Consequently, except where assets and liabilities are denominated in currencies fixed to the Barbados dollar, the Fund is exposed to currency risk. The Fund's policy is not to enter into any hedging transactions to mitigate currency risk. The Fund has no significant exposure to currency risk at year end as the foreign currencies within the Fund do not fluctuate noticeably against the Barbados dollar.

Fortress Caribbean Pension Fund Limited

September 30, 2019

(expressed in Barbados dollars)

4 Financial risk management ...continued

Credit risk

Credit risk is the risk that an issuer or counterparty will be unable or unwilling to meet a commitment entered into with the Fund.

The maximum exposure of the Fund to the credit risk is set out in the following table:

	Aggressive Accumulator	Conservative Consolidator	Capital Secure
	\$	\$	\$
September 30, 2019			
Government backed securities	–	1,375,267	–
Accounts receivable	932,967	766,208	60,196
Cash and cash equivalents	546,600	428,163	32,861
	1,479,567	2,569,638	93,057
September 30, 2018			
Government backed securities	–	1,424,568	–

Liquidity risk

The Fund is exposed to monthly cash redemptions of redeemable mutual fund shares (note 2g). It therefore invests the majority of its assets in investments that are easily liquidated. The table below analyses the Fund's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date. The amounts disclosed in the table below are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances, as the impact of discounting is not significant.

Capital Secure	396,949	10,704,283	–

Capital risk management

The capital of the Fund is represented by the net assets attributable to holders of redeemable shares. The amount of net assets attributable to holders of redeemable shares can change significantly on a monthly basis as the Fund is subject to monthly subscriptions and redemptions at the discretion of shareholders. The Fund's objective when managing capital is to safeguard the Fund's ability to continue as a going concern in order to provide returns for shareholders and to maintain a strong capital base to support the development of the investment activities of the Fund.

Fair value estimation

The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices at the close of trading on the year end date. The quoted market price used for financial assets held by the Fund is the current exit price; the quoted market price for financial liabilities is the current asking price. If a significant movement in fair value occurs subsequent to the close of trading on the year end date, valuation techniques will be applied to determine the fair value.

An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

Fortress Caribbean Pension Fund Limited

Notes to Financial Statements

September 30, 2019

(expressed in Barbados dollars)

4 Financial risk management ...continued

Fair value estimation...continued

The Fund is required to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety.

For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes ‘observable’ requires significant judgment by the Fund. The Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The following tables analyse within the fair value hierarchy the Fund’s financial assets and liabilities (by class) measured at fair value:

4 Financial risk management ...continued

Fair value estimation...continued

Investments whose value are based on quoted market prices in active markets, and therefore classified within level 1, include active listed close-ended mutual funds. The Fund does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These are unlisted mutual funds and listed equity securities. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include government issued debt. As observable prices are not available for these securities, the Fund has used valuation techniques to derive the fair value.

The following table presents the transfers between levels for the year ended September 30, 2019:

(expressed in Barbados dollars)

4 Financial risk management ...continued

Fair value estimation...continued

Assets and liabilities not carried at fair value but for which fair value is disclosed...continued

The puttable value of redeemable shares is calculated based on the net difference between total assets and all other liabilities of the Fund in accordance with the Fund's offering memorandum. These shares are not traded on an active market. A demand feature is attached to these shares, as they are redeemable at the holders' option and can be put back to the Fund at any dealing date for cash equal to a proportionate share of the Fund's net asset value attributable to the share class (note 2g). The fair value is based on the amount payable on demand, discounted from the first date that the amount could be required to be paid. The impact of discounting in this instance is not material. As such, Level 2 is deemed to be the most appropriate categorisation for net assets attributable to holders of redeemable shares.

5 Financial assets...continued

The Fortress Mutual Fund Limited aims to achieve long term capital appreciation from Caribbean securities. The fund's assets are invested mainly in shares of companies listed on the Caribbean stock exchanges.

The Fortress Caribbean High Interest Fund Limited aims to achieve the highest level of income compatible with the preservation of capital by investing in medium to high grade debt and equity securities issued by corporate and government entities with a short to medium term maturity profile principally in the Caribbean Region.

The Fortress OAM Overseas Fund Limited aims through its investments in OAM Asian Recovery Fund and OAM European Value Fund, to offer investors long-term capital appreciation through the application of a bottom-up value-based investment approach.

The objective of Fortress Emerging Markets Fund SP is long term growth with limited risk in emerging markets equities.

The objective of Fortress Global Opportunity Wealth Fund SP is long term appreciation. The fund combines investments in Fortress US Equity Fund SP, Fortress International Equity Fund SP, Fortress Income Builder US Fund SP, Fortress Income Builder International Fund SP, Fortress Emerging Markets Fund SP, direct holding in global government fixed income securities and allocations to select specialist managers in fixed income, equity and alternatives assets classes.

6 Related parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

Fortress Fund Managers Limited serves as manager, registrar and administrator of the Fund. As a result of providing investment advisory, management, registrar and administrator services, Fortress Fund Managers Limited receives a monthly management fee based on the actual net asset value of the Fund, calculated monthly and payable in arrears, at the rate of 0.50% per annum. The Fund invests in mutual funds managed by the same manager. The management fee amounted to \$1,538,713 (2018 - \$1,478,179) for the year. The administrator fees amounted to \$92,323 (2018- \$88,690) for the year.

Management fees of \$2,945,056 (2018 - \$2,844,148) were refunded by Fortress Fund Managers Limited being 0.50% - 1.25% of the net asset values of Fortress Mutual Fund Limited, Fortress Caribbean Property Fund SCC Limited, Fortress OAM Overseas Management Fund Limited and Fortress Caribbean High Interest Fund shares held by the Fund during the year. This is to avoid double charging of management fees on assets invested in related Funds which have the same Manager.

Management fees of \$20,716 (2018- \$10,610) were refunded by Fortress Fund Advisory Limited (a subsidiary of Fortress Fund Managers Limited) being 1% of the net asset values of Fortress Emerging Markets Fund and Fortress Global Opportunity Wealth Fund shares held by the Fund during the year. This is to avoid double charging of management fees on assets invested in related Funds which have the same Manager.
